Safety relevant documents

Especially in places with many people, for example in schools, hotels, multipurpose and event halls, shopping malls, commercial buildings, restaurants, etc., but also in industrial and commercial enterprises, various security plans and other documents are required, which in the event of a fire or another emergency case enable a rapid alert, a safe evacuation and a targeted and efficient intervention by the emergency services.

Examples of such safety-relevant plans and documents are:

- Fire safety regulation
- Escape and rescue route plans
- Alarm plans
- Emergency plans (internal / external)
- Firefighting plans
- Fire brigade routing cards Brandschutzordnungen

The obligation to draw up such plans and documents is based on general regulations, occupational health and safety legislation and individual operating licenses.

We have extensive experience in drawing up such plans and documents and, where necessary, coordinating with the relevant forces and authorities.
